

EBAY INC. REPORTS SECOND QUARTER 2008 RESULTS

San Jose, Calif., July 16, 2008 — eBay Inc. (Nasdaq: EBAY) today reported financial results for its second quarter ended June 30, 2008. The ecommerce company posted second quarter revenue of \$2.20 billion, up \$361 million from the same period last year. Net income on a GAAP basis was \$460 million, or \$0.35 per diluted share, and non-GAAP net income was \$568 million, or \$0.43 per diluted share.

“This was a strong quarter and we are very pleased with the performance of the portfolio, particularly with the growth generated by PayPal,” said eBay Inc. President and CEO John Donahoe. “We have made bold moves across the eBay marketplace to accelerate long-term growth. We remain confident in our strategies to improve the customer experience as we manage in an uncertain economic climate.”

eBay continues to benefit from an increasingly diversified portfolio of businesses. While Marketplaces transaction revenue continues to represent a majority of revenue for the company, revenue growth rates were helped by the company’s faster growing businesses such as PayPal, global classifieds, advertising and Skype. The company’s global footprint helped it benefit from strength in other currencies, relative to the U.S. dollar.

GAAP operating margin decreased slightly to 24.8% for the quarter, compared to 24.9% for the same period last year. Non-GAAP operating margin decreased to 31.9% for the quarter, compared to 32.4% for the same period last year. The decrease in operating margins was caused primarily by the company’s faster growing, lower-margin businesses, such as PayPal and Skype.

eBay Inc. generated \$738 million of operating cash flow during the second quarter. Free cash flow during the quarter was \$617 million.

Quarterly Business Highlights

- eBay Inc. repurchased approximately 19 million shares of its outstanding common stock at a cost of approximately \$566 million. Since the inception of the share buyback program in the third quarter of 2006, the company has repurchased \$4.7 billion of its common stock.

Net total payment volume (TPV) for the quarter was \$14.93 billion, an increase of 35% year-over-year. The net revenue and net TPV growth was driven primarily by the continued excellent growth of merchant services globally and increased penetration on eBay internationally. - (1) Beginning with the first quarter of 2008, we reclassified revenue generated primarily from our Marketplaces non-gross merchandise volume based businesses (which includes Shopping.com, Rent.com and our classified websites) from "Net Transaction Revenues" to "Marketing Services and Other Revenues" in order to more closely align our net transaction revenue presentation with our key operating metrics. "Marketing Services and Other Revenues" also includes amounts previously reflected under "Advertising and Other Revenue." Prior period amounts have been reclassified to conform to the current presentation. Consolidated revenues, as well as total segment revenues, are unchanged.

Non-GAAP Measures of Financial Performance

To supplement the company's consolidated financial statements presented in accordance with generally accepted accounting principles, or GAAP, eBay uses non-GAAP measures of certain components of financial performance. These non-GAAP measures include non-GAAP net income, non-GAAP earnings per diluted share, non-GAAP operating margin, non-GAAP effective tax rate, and free cash flow.

These non-GAAP measures are not in accordance with, or an alternative for, measures prepared in accordance with GAAP and may be different from non-GAAP measures used by other companies. In addition, these non-GAAP measures are not based on any comprehensive set of accounting rules or principles. Non-GAAP measures have limitations in that they do not reflect all of the amounts associated with eBay's results of operations as determined in accordance with GAAP. These measures should only be used to evaluate eBay's results of operations in conjunction with the corresponding GAAP measures.

Reconciliation to the nearest GAAP measure of all non-GAAP measures included in this press release can be found in the tables included on page 13, 15 and 16 of this press release.

These non-GAAP measures are provided to enhance investors' overall understanding of the company's current financial performance and the company's prospects for the future. Specifically, the company believes the non-GAAP measures provide useful information to both management and investors by excluding certain expenses, gains and losses, and net purchases of property and equipment that may not be indicative of its core operating results and business outlook. In addition, because eBay has historically reported certain non-GAAP results to investors, the company believes the inclusion of non-GAAP measures provides consistency in the company's financial reporting.

For its internal budgeting process, and as discussed further below, eBay's management uses financial statements that do not include stock-based compensation expense, employer payroll taxes on stock-based compensation, amortization or impairment of acquired intangible assets and the income taxes associated with the foregoing. In addition to the corresponding GAAP measures, eBay's management also uses the foregoing non-GAAP measures in reviewing the financial results of eBay.

eBay excludes the following items from non-GAAP net income, non-GAAP earnings per diluted share, non-GAAP operating margin and non-GAAP effective tax rate:

Stock-based compensation expense. This expense consists of expenses for stock options, restricted stock and employee stock purchases under Statement of Financial Accounting Standards No. 123 (revised 2004), "Share-Based Payment." eBay excludes stock-based compensation expenses from its non-GAAP measures primarily because they are non-cash expenses that eBay does not believe are reflective of ongoing operating results.

Employer payroll taxes on stock-based compensation. This amount is dependent on eBay's stock price and the timing and size of exercise by employees of their stock options and restricted stock, over which management has limited to no control, and as such does not correlate to eBay's operation of the business.

Amortization or impairment of acquired intangible assets and impairment of goodwill. eBay incurs amortization or impairments of acquired intangible assets in connection with acquisitions. eBay excludes these items because they arise from eBay's prior acquisitions and have no direct correlation to the current operating results of eBay's business.

Income taxes associated with certain non-GAAP entries. This amount is used to present stock-based compensation and the other amounts described above on an after-tax basis consistent with the presentation of non-GAAP net income.

In addition to the non-GAAP measures discussed above, eBay also uses free cash flow. Free cash flow represents operating cash flows less net purchases of property and equipment. eBay considers free cash flow to be a liquidity measure that provides useful information to management and investors about the amount of cash generated by the business after the purchases of property, buildings, and equipment, which can then be used to, among other things, invest in eBay's business, make strategic acquisitions, strengthen the balance sheet and repurchase stock. A limitation of free cash flow is that it does not represent the total increase or decrease in the company's cash balance for the period.
